NEW

DARK HORSE — GLOBAL MOVER RADAR

3 standouts found this cycle.
1 fresh (new this scan) · 1 still active · 1 fading.

EXPANDED TERMINOLOGY HYPERLINKS

Breakout] Pullback] Support / Resistance] Invalidation] Risk-Off] Market

► Market Mood · ELEVATED ●●●● (4 / 5)

What **Market Mood** means right now:
The broader market is moving fast. Bigger swings either side are more likely than usual. Trades that worked in calm conditions are more likely to be whipped out before reaching their target.

What this means for your trading today (dollars-first):
● Position size — cut from your normal 100% down to 60–70%.
On a \$10,000 account that means \$300–\$420 risk per trade instead of \$500. Why: bigger swings = wider stops = more

dollars at risk per setup.

● Risk-off levels — widen them, do NOT tighten. Give the trade room to breathe.

● Marginal setups — skip them. Only act on the cleanest reads.

● Do NOT chase already-extended moves. Wait for the next structural test instead.

★ STANDOUTS — TODAY'S STRONGEST MOVERS

FRESH

· STANDOUT #1 of 3 · EURUSD just appeared on this scan

EURUSD · STRONG BULLISH

Price pushed above 1.0950 — a level that had capped EURUSD for the last 3 weeks — and held the level cleanly on the 1H close. The move is new this scan.

MOVE TYPE

Breakout · early stage

DIRECTION

Long ▲ — expecting price to keep moving up

CONVICTION

●●●● / 5 · High

TRIGGER LEVEL

Trigger Level: **1.0950**

Why it matters: 1.0950 capped every push for 3 weeks.

It has flipped from ceiling into floor — price now treats it as Support.

HORIZON

Swing — days, not minutes

TODAY'S RANK

Cycle Rank: 1st of today's 3 standouts

WHERE TO ACT

● ENTRY zone 1.0920 – 1.0935

What this means: price has pulled back into the band where buyers stepped in the last time the level was tested.

Required price behaviour: a 5-minute candle that opens inside the band and closes above the band low.

Action: BUY on that candle close. Start with HALF size.

● WATCH level 1.0900

What this means: buyers are losing initial control. The first warning sign that the read is weakening.

\$ If price closes below 1.0900 on the 1H, open positions are typically down 30–50% of planned risk (~ \$120 on \$100k notional EURUSD).

Action: hold what you have, do NOT add more.

● CAUTION zone 1.0900 – 1.0880

What this means: the other side is in control inside this band.

Holding from here is fighting the structure.

\$ Position drawdown 50–80% of planned risk.

Action: scratch the trade for a small loss. Re-read at next scan.

● Invalidation 1.0875

What this means: the bullish idea is OFF entirely.

\$ Full planned risk taken: \$300 on \$100k notional EURUSD.

Action: exit any remaining size NOW. Do NOT re-enter — wait for a fresh structure on a later scan.

● Next review 12:15 UTC

ATLAS re-reads every zone at the next scan.

\$ DOLLAR RISK THIS TRADE

\$ **Standard plan: **\$300 risk on \$100k notional EURUSD** (entry 1.0925, stop 1.0895, 30-point distance).**

\$ **At 30% reduced size (per Market Mood ELEVATED): **\$90 risk on \$30k notional**.**

\$ **Reward target if EURUSD reaches 1.1010 first: **~\$510** on reduced size · **5.7R**.**

WHAT THIS MEANS

The path of least resistance is up while 1.0875 holds. Buying the dip into the green entry band is the trade ATLAS would take.

WHAT TO DO NEXT

- ① Wait for a 5-min candle to open inside 1.0920–1.0935.
- ② Buy that candle's close.
- ③ Place the risk-off at 1.0895.
- ④ If 1.0900 closes below on 1H, exit half and stand aside until the next scan.

ATLAS · Dark Horse · standout 1 of 3 · first detected at this scan (Tuesday 13 May · 12:00 UTC)

ATLAS · Dark Horse Radar

STILL ACTIVE · STANDOUT #2 of 3 · XAUUSD (cycle 2 — trending 1+ day)

 XAUUSD · STRONG BEARISH

Gold broke below 2398 on the 1H close 2 cycles ago. Sellers are still in control and the broken level has held as a ceiling on every bounce since.

MOVE TYPE

Breakdown · mid stage

DIRECTION

Short ▼ — expecting price to keep moving down

CONVICTION

●●●●● / 5 · High

TRIGGER LEVEL

Trigger Level: **2398**

Why it matters: 2398 was the floor that held for 4 weeks.

It broke 2 cycles ago — now flipped into a ceiling. Sellers defend every bounce.

HORIZON

Swing — days, not minutes

TODAY'S RANK

Cycle Rank: 2nd of today's 3 standouts

WHERE TO ACT

● **ENTRY zone 2398 – 2402**

What this means: price has pulled back into the band where sellers stepped in the last time the level was tested.

Required price behaviour: a 5-minute candle that opens inside the band and closes below the band high.

Action: SELL on that candle close. Start with HALF size.

● WATCH level 2406

What this means: sellers are losing initial control. The first warning sign that the read is weakening.

\$ If price closes above 2406 on the 1H, open positions are typically down 30–50% of planned risk (~ \$540 on 1 lot XAUUSD (100 oz)).

Action: hold what you have, do NOT add more.

● CAUTION zone 2406 – 2412

What this means: the other side is in control inside this band.

Holding from here is fighting the structure.

\$ Position drawdown 50–80% of planned risk.

Action: scratch the trade for a small loss. Re-read at next scan.

● Invalidation 2415

What this means: the bearish idea is OFF entirely.

\$ Full planned risk taken: \$1350 on 1 lot XAUUSD (100 oz).

Action: exit any remaining size NOW. Do NOT re-enter — wait for a fresh structure on a later scan.

● Next review 12:15 UTC

ATLAS re-reads every zone at the next scan.

\$ DOLLAR RISK THIS TRADE

\$ **Standard plan: **\$1,350 risk on 1 lot XAUUSD** (entry 2401.50, stop 2415.00, \$13.50/oz × 100 oz).**

\$ **At 30% reduced size (per Market Mood ELEVATED): **\$405 risk on 0.3 lot**.**

\$ **Reward target if XAUUSD reaches 2360 first: **~\$1,245** on reduced size · **3.1R**.**

WHAT THIS MEANS

The path of least resistance is down while 2415 holds. Selling rallies into the green entry band is the trade.

WHAT TO DO NEXT

① Wait for price to rally into 2398–2402. ② Watch for a stalling candle (small range body, no close above 2402). ③ Sell that stall. ④ Stop at 2415. ⑤ If 2406 closes above on 1H, exit half.

ATLAS · Dark Horse · standout 2 of 3 · first detected 11:30 UTC · still trending in cycle 2 of 3

ATLAS · Dark Horse Radar

FADING · STANDOUT #3 of 3 · NVDA — older mover, late-stage caution

 NVDA · DEVELOPING WATCH

NVIDIA's uptrend has been running for 4 cycles. Each new high is smaller than the last. The move is mature — wait for the next test, do not chase.

MOVE TYPE

Continuation · late stage

DIRECTION

Long ▲ — but reward is shrinking

CONVICTION

●●● / 5 · Reduced

TRIGGER LEVEL

Trigger Level: **925.40**

Why it matters: 925.40 is the structural level the uptrend rotates around.

Still valid — but each push above it is smaller than the last. Reward is fading.

HORIZON

Intraday — hours, not days

TODAY'S RANK

Cycle Rank: 3rd of today's 3 standouts

WHERE TO ACT

● ENTRY zone 918.00 – 922.00

What this means: price has pulled back into the band where buyers stepped in the last time the level was tested.

Required price behaviour: a 5-minute candle that opens inside the band and closes above the band low.

Action: BUY on that candle close. Start with HALF size.

● WATCH level 912.80

What this means: buyers are losing initial control. The first warning sign that the read is weakening.

\$ If price closes below 912.80 on the 1H, open positions are typically down 30–50% of planned risk (~ \$744 on 100 shares NVDA).

Action: hold what you have, do NOT add more.

● CAUTION zone 912.80 – 906.00

What this means: the other side is in control inside this band.

Holding from here is fighting the structure.

\$ Position drawdown 50–80% of planned risk.

Action: scratch the trade for a small loss. Re-read at next scan.

● Invalidation 902.50

What this means: the bullish idea is OFF entirely.

\$ Full planned risk taken: \$1860 on 100 shares NVDA.

Action: exit any remaining size NOW. Do NOT re-enter — wait for a fresh structure on a later scan.

● Next review 12:15 UTC

ATLAS re-reads every zone at the next scan.

\$ DOLLAR RISK THIS TRADE

\$ **Standard plan: **\$1,860 risk on 100 shares NVDA** (entry \$921.10, stop \$902.50, \$18.60/share × 100).**

\$ **At HALF size (FADING discipline — late-stage cards): **\$930 risk on 50 shares**.**

\$ **Reward target if NVDA reaches \$945 first: **~\$1,195** on 50 shares · **1.3R**.**

⚠ **Reward-to-risk is below 2R — only take this if other cards are not available.**

WHAT THIS MEANS

The trend still exists, but the easy reward has already been earned. Late buyers get whipped out the most often.

WHAT TO DO NEXT

① Half size at most — this is not a primary entry. ② Only buy a clean pullback into 918–922 that prints a strong defensive 5-min close. ③ If 912.80 closes below on 1H, exit the

trade.

 LATE-STAGE CAVEAT

Size small — the move is late. Skip this card if the FRESH or STILL ACTIVE standouts above offer a cleaner setup today.

BUILDING · CHART REFERENCE

BUILDING — WARMING UP BELOW STANDOUT GRADE

Pre-Radar] Pullback] Resistance] Support]

- _Two markets are close to the standout bar but not there yet._
- _GBPUSD needs a 1H close above 1.2600 to qualify._
- _EURJPY needs momentum to expand on its next push (currently flat)._
- _If either firms up by the next scan, they'll graduate into a standout._

CHART REFERENCE — HOW TO READ THE FOUR ZONES

 Clean Bullish Breakout — Reference

Every Dark Horse candidate above is the same pattern in different markets. This is what it looks like on the chart, and what a trader actually does at each zone.

THE STORY

Price pushed through a level that had capped it for weeks (the old high). It came back to test the same level. Buyers stepped in to defend it. The ceiling has flipped into a floor.

HOW A TRADER ACTS (CONCRETE)

● BUY the pullback into the green ENTRY band — ONLY if the next 5-min candle opens inside the band AND closes above the band low.

● Place the risk-off just below the dashed red INVALIDATION line. If price closes below it on the 1H, exit immediately.

\$ Dollar risk = (entry price – stop price) × position size × \$/point. Size the trade so this number ≤ 1% of your account.

RENDERED ATLAS CHART CARDS — NEXT EVOLUTION

Future scans will replace this prototype with a snapshot of the actual candidate, with the four zones drawn on live price action. Captured as TRC-20260513-006.

ATLAS · Dark Horse Radar

► Risk reminder

Every zone above is what ATLAS sees right now. Live price moves, the zones move with it. Cross-check the current price against the zone before acting. ATLAS reviews again at 12:15 UTC.

► Briefing summary

3 standouts today (1 FRESH, 1 STILL ACTIVE, 1 FADING). Market Mood ELEVATED (4/5) — cut position sizing by 30%. The FRESH EURUSD card carries the cleanest reward-to-risk (5.7R on reduced size). The STILL ACTIVE XAUUSD short is in cycle 2 and the structure is holding (3.1R). The FADING NVDA card is a HALF-SIZE scalp only (1.3R) — skip if better setups exist. Next scan 12:15 UTC.
