HIGH IMPACT

Wed 06:00 UTC — UK CPI

WHY THIS MATTERS

Three high-impact catalysts cluster early week (ECB Mon, CPI Wed, NFP Fri). USD inflation + EUR policy tone dominate; gold and US indices most sensitive.

MARKET IMPACT · TRANSMISSION CHAIN

cause: clustered catalyst window → expectation: front-end rate-path repricing on each release → market reaction: USD and EUR lead, JPY safe-haven flow secondary → asset impact: NAS100, XAUUSD, EURUSD highest beta.

CROSS-ASSET CONSEQUENCES

FX: EURUSD, USDJPY, GBPUSD — direction set by Mon ECB tone + Wed CPI surprise.
Indices: NAS100, US500 — rate-sensitive; expect VWAP-led reversals on each catalyst.
Commodities: XAUUSD inverse to USD/yields; XAGUSD follows.

OPERATOR GUIDANCE

Confirms: Live confirmation required after Mon Asia open. Watch the lead pair on first 1H close.
Cancels: Geopolitical override before Mon open, or weekend gap fills inside 30 min on reopen.

NEXT WATCH WINDOW

🕒 Asia reopen Sun 22:00 UTC. London 07:00 UTC Mon. NY 13:30 UTC Mon.
