```

```
▸ Market Mood  ·  🟠🟠🟠🟠⚫ 4/5 — Elevated
```

What Market Mood means right now:
The broader market is moving fast. Bigger swings either side are more likely than usual. Trades that worked in calm conditions are more likely to be stopped out before reaching their target.

What this means for your trading today (dollars-first):
🟢 Position size — If your normal risk per trade is $500 on a $10,000 account, reduce to ~$300 (60% of normal) for the next 6 hours. On a $25,000 account, reduce from $1,250 to ~$750. Why: bigger market swings mean wider exit-points are needed, which means more $$$ at risk per setup.
🟡 Exit-points — give the trade more room. A tight exit-point is more likely to be hit before the move confirms direction. Concrete: instead of 30-point exit on EURUSD, use 40-50.
🟠 Marginal setups — skip them. Only act on candidates where the trigger level is broken AND the next candle closes beyond it (the **confirmed directional structure** check, see below for example).
🛑 Do NOT chase already-extended moves. Example: NVDA at $940 after a $20 push from $920 is NOT a fresh entry. Wait for price to come back to a structural test (the floor that

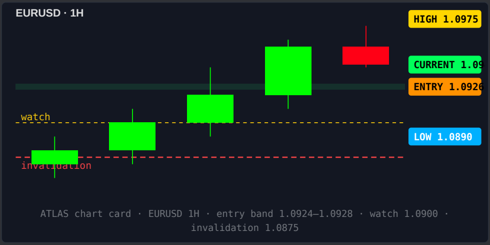
was the ceiling) — see the NVDA card below.

⭐ STANDOUTS — TODAY'S STRONGEST MOVERS

FRESH · STANDOUT #1 of 3 · EURUSD just appeared on this scan

🐎 EURUSD · STRONG BULLISH

Price pushed above 1.0950 — a level that had capped EURUSD for the last 3 weeks — and held the level cleanly on the 1H close. The move is new this scan.



ATLAS chart card · EURUSD 1H · entry band 1.0924–1.0928 · watch 1.0900 · invalidation 1.0875

MOVE TYPE

Breakout · early stage

DIRECTION

Long ▲#term-long — expecting price to keep moving u

CONVICTION

🟢🟢🟢🟢⚫ 4/5 — High

Why High: trigger level broke + momentum increased + retest held + the broken level is now defended by buyers (all 4 criteria met).

TRIGGER LEVEL

Trigger Level#term-trigger-level: **1.0950**

Why it matters: 1.0950 capped every push for 3 weeks.

_It has flipped from ceiling into floor — price now treats it as Support.

EXPECTED DURATION

Expected Duration#term-expected-duration: Swing — days, not minute

TODAY'S RANK

Cycle Rank#term-cycle-rank: 1st of today's 3 standout

WHERE TO ACT

🟢 ENTRY zone 1.0924 – 1.0928

What this means: price has pulled back into the tight band where buyers stepped in the last time the level was tested.

Required price behaviour: a 5-minute candle that opens inside the band AND closes above the band low (this is the COLENTRYconfirmed directional structure test).

Action: BUY on that candle close — start with HALF your normal trade size. Concrete: if your normal trade is 1 lot, begin with **0.5 lot** = **~$150** risk.

🟡 WATCH level 1.0900

What this means: buyers are losing initial control. The first warning sign that the move is weakening.
💲 If price closes below COLWATCH1.0900 on the 1H, the half-size position is typically down 30–50% of planned risk (COLMONEY~$60 of the COLMONEY~$150 at risk).
Action: hold what you have, do NOT add more.

🟠 CAUTION zone 1.0900 – 1.0880
COLCAUTIONWhat this means: the other side is in control inside this band.
COLCAUTIONHolding from here means fighting the structure — exit risk
COLCAUTIONis now real, not theoretical.
💲 Position drawdown 50–80% of planned risk (COLMONEY~$98 of the COLMONEY~$150).
Action: scratch the trade for a small loss now. Re-read at next scan.

🔴 Invalidation#term-invalidation 1.0875
What this means: the bullish idea is OFF entirely.
💲 Full planned risk taken: COLMONEY$150 on 0.5 lot ($50k notional).
Action: exit ALL remaining size NOW. Do NOT re-enter — wait for a fresh structure on a later scan.

🔵 Next review 12:15 UTC

ATLAS re-reads every zone at the next scan.

💲 DOLLAR RISK THIS TRADE — HALF SIZE FOR FRESH

💲 Standard plan: **$300 risk on 1 lot EURUSD** (entry 1.0925, exit 1.0895, 30-point distance).

💲 Recommended start (HALF size on a FRESH candidate): **0.5 lot = COLMONEY~$150 risk**.

💲 If Market Mood drops to Calm (1/5) you can scale up to full 1 lot after a clean re-read.

💲 Reward target if EURUSD reaches 1.1010 first: **COLMONEY~$255** on 0.5 lot · **COLMONEY5.7R**.

WHAT THIS MEANS

The path of least resistance is up while 1.0875 holds. Buying the dip into the tight green entry band is the trade ATLAS would take.

WHAT TO DO NOW

① Wait for a 5-min candle to open inside 1.0924 – 1.0928.
② BUY that candle's close — 0.5 lot of your normal 1-lot trade size.
③ Place the exit-point at 1.0895 (COLMONEY~$150 risk).
④ If 1.0900 closes below on 1H, exit half of your remaining position (0.25 lot, freeing COLMONEY~$75) and hold the rest with the exit-point unchanged.
⑤ Full exit at COLINVALID1.0875 if

reached — the bullish idea is OFF.

WHAT CONFIRMS THE IDEA

A 5m close above 1.0928 after pulling back into the entry band — the confirmed directional structure test (price closes past the trigger AND the next candle holds beyond it).

WHAT CANCELS THE IDEA

A 1H close below 1.0875. At that point the ceiling-to-floor flip has failed and the move is invalidated.

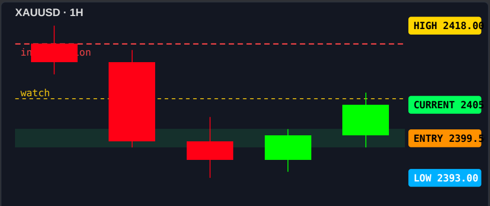
ATLAS · Dark Horse · standout 1 of 3 · first detected at this scan (Tuesday 13 May · 12:00 UTC)

ATLAS · Dark Horse Radar

STILL ACTIVE · STANDOUT #2 of 3 · XAUUSD (2h 30m)

🐎 XAUUSD · STILL TRENDING

Gold broke below 2398 on the 1H close 2 cycles ago. Sellers are still in control and the broken level has held as a ceiling on every bounce since.



ATLAS chart card · XAUUSD 1H · short on rally into 2398–2401 · invalidation 2415 (red dashed)

MOVE TYPE

Breakdown · mid stage

DIRECTION

Short ▼#term-short — expecting price to keep moving dow

CONVICTION

🔴🔴🔴🔴⚫ 4/5 — High

Why High: trigger level broke + sellers defended every retest across 2 cycles + momentum holding (3 of 4 criteria met).

TRIGGER LEVEL

Trigger Level#term-trigger-level: **2398**

Why it matters: 2398 was the floor that held for 4 weeks.

_It broke 2 cycles ago — now flipped into a ceiling. Sellers defend every bounce.

EXPECTED DURATION

Expected Duration#term-expected-duration: Swing — days, not minute

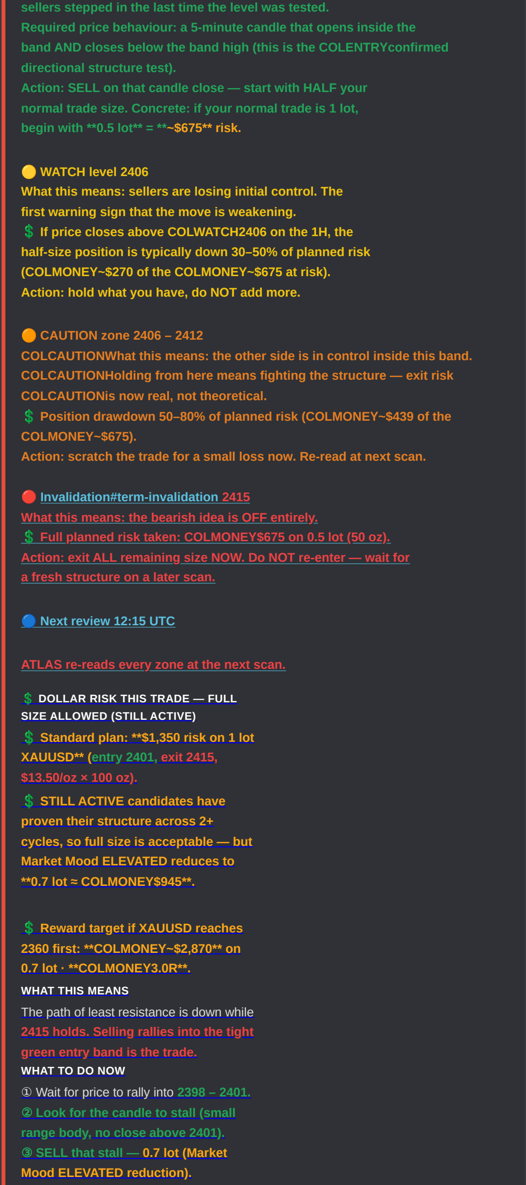
TODAY'S RANK

Cycle Rank#term-cycle-rank: 2nd of today's 3 standout

WHERE TO ACT

🟢 ENTRY zone 2398 – 2401

What this means: price has pulled back into the tight band where



sellers stepped in the last time the level was tested.
Required price behaviour: a 5-minute candle that opens inside the band AND closes below the band high (this is the COLENTRYconfirmed directional structure test).
Action: SELL on that candle close — start with HALF your normal trade size. Concrete: if your normal trade is 1 lot, begin with **0.5 lot** = **~$675** risk.

🟡 WATCH level 2406
What this means: sellers are losing initial control. The first warning sign that the move is weakening.
💲 If price closes above COLWATCH2406 on the 1H, the half-size position is typically down 30–50% of planned risk (COLMONEY~$270 of the COLMONEY~$675 at risk).
Action: hold what you have, do NOT add more.

🟠 CAUTION zone 2406 – 2412
COLCAUTIONWhat this means: the other side is in control inside this band.
COLCAUTIONHolding from here means fighting the structure — exit risk
COLCAUTIONis now real, not theoretical.
💲 Position drawdown 50–80% of planned risk (COLMONEY~$439 of the COLMONEY~$675).
Action: scratch the trade for a small loss now. Re-read at next scan.

🔴 Invalidation#term-invalidation 2415
What this means: the bearish idea is OFF entirely.
💲 Full planned risk taken: COLMONEY$675 on 0.5 lot (50 oz).
Action: exit ALL remaining size NOW. Do NOT re-enter — wait for a fresh structure on a later scan.

🔵 Next review 12:15 UTC

ATLAS re-reads every zone at the next scan.

💲 DOLLAR RISK THIS TRADE — FULL SIZE ALLOWED (STILL ACTIVE)

💲 Standard plan: **$1,350 risk on 1 lot XAUUSD** (entry 2401, exit 2415, $13.50/oz × 100 oz).

💲 STILL ACTIVE candidates have proven their structure across 2+ cycles, so full size is acceptable — but Market Mood ELEVATED reduces to **0.7 lot ≈ COLMONEY$945**.

💲 Reward target if XAUUSD reaches 2360 first: **COLMONEY~$2,870** on 0.7 lot · **COLMONEY3.0R**.

WHAT THIS MEANS

The path of least resistance is down while 2415 holds. Selling rallies into the tight green entry band is the trade.

WHAT TO DO NOW

① Wait for price to rally into 2398 – 2401.
② Look for the candle to stall (small range body, no close above 2401).
③ SELL that stall — 0.7 lot (Market Mood ELEVATED reduction).

④ Place the exit-point at 2415 (COLMONEY~$945 risk).

⑤ If 2406 closes above on 1H, exit half (0.35 lot, freeing COLMONEY~$470).

WHAT CONFIRMS THE IDEA

A 5m close below **2398 after rallying into the entry band, with the next candle holding below.**

WHAT CANCELS THE IDEA

A 1H close above **2415. At that point the broken floor has been reclaimed and the bearish idea is OFF.**

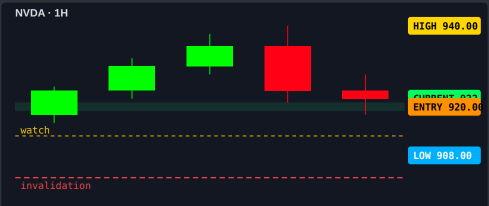
ATLAS · Dark Horse · standout 2 of 3 · first detected 11:30 UTC · still trending in cycle 2 of 3

ATLAS · Dark Horse Radar

FADING · STANDOUT #3 of 3 · NVDA — older mover, late-stage caution

🐎 NVDA · DEVELOPING WATCH

NVIDIA's uptrend has been running for 4 cycles. Each new high is smaller than the last. The move is mature — wait for a structural test, do not chase from $940.



ATLAS chart card · NVDA 1H · late-stage band 919–921 (tight) · invalidation 902.50

MOVE TYPE

Continuation · late stage

DIRECTION

Long ▲#term-long — but reward is shrinkin

CONVICTION

🟠🟠🟠⚫⚫ 3/5 — Reduced

Why Reduced: trigger level still valid + buyers still defending — BUT each new high is smaller than the last, and the move is now 4 cycles old (2 of 4 criteria met, 2 weakening).

TRIGGER LEVEL

Trigger Level#term-trigger-level: **925.40**

Why it matters: 925.40 is the structural level the uptrend rotates around.

_Still valid — but each push above it is smaller than the last. Reward is fading.

EXPECTED DURATION

Expected Duration#term-expected-duration: Intraday — hours, not day

TODAY'S RANK

Cycle Rank#term-cycle-rank: 3rd of today's 3 standout

WHERE TO ACT

🟢 ENTRY zone 919.00 – 921.00

What this means: price has pulled back into the tight band where buyers stepped in the last time the level was tested.
Required price behaviour: a 5-minute candle that opens inside the band AND closes above the band low (this is the COLENTRYconfirmed directional structure test).
Action: BUY on that candle close — start with HALF your normal trade size. Concrete: if your normal trade is 1 lot, begin with **0.5 lot = **~$930** risk.**

🟡 WATCH level 912.80
What this means: buyers are losing initial control. The first warning sign that the move is weakening.
💲 If price closes below COLWATCH912.80 on the 1H, the half-size position is typically down 30–50% of planned risk (COLMONEY~$372 of the COLMONEY~$930 at risk).
Action: hold what you have, do NOT add more.

🟠 CAUTION zone 912.80 – 906.00
COLCAUTIONWhat this means: the other side is in control inside this band.
COLCAUTIONHolding from here means fighting the structure — exit risk
COLCAUTIONis now real, not theoretical.
💲 Position drawdown 50–80% of planned risk (COLMONEY~$605 of the COLMONEY~$930).
Action: scratch the trade for a small loss now. Re-read at next scan.

🔴 Invalidation#term-invalidation 902.50
What this means: the bullish idea is OFF entirely.
💲 Full planned risk taken: COLMONEY$930 on 25 shares.
Action: exit ALL remaining size NOW. Do NOT re-enter — wait for a fresh structure on a later scan.

🔵 Next review 12:15 UTC

ATLAS re-reads every zone at the next scan.

💲 DOLLAR RISK THIS TRADE — QUARTER SIZE ONLY (FADING)

💲 Standard plan: **$1,860 risk on 100 shares NVDA (entry $920, exit $902.50, $18.60/share × 100).**

💲 FADING candidates: QUARTER size at most — **25 shares = COLMONEY~$465 risk.**

💲 Reward target if NVDA reaches $945 first: **COLMONEY~$600 on 25 shares · **COLMONEY1.3R**.**

⚠️ Reward-to-risk is below 2R — only take this if no other cards are available.

WHAT THIS MEANS

The trend still exists, but the easy reward has already been earned. Late buyers get stopped out the most often.

WHAT TO DO NOW

① QUARTER size at most — this is not a

primary entry. 25 shares = ~$465 risk.

② Only buy a clean pullback into 919 – 921 that prints a strong defensive 5-min close.

③ Place the exit-point at 902.50 (COLMONEY~$465 risk).

④ If 912.80 closes below on 1H, exit ALL — late-stage cards do not give second chances.

⑤ Skip this card entirely if the FRESH or STILL ACTIVE standouts above offer a cleaner setup today.

WHAT CONFIRMS THE IDEA

A 5m close above 921 after pulling back, with strong defensive volume on the bounce.

WHAT CANCELS THE IDEA

A 1H close below 912.80 OR any close below 902.50. The mature uptrend has rolled over.

⚠️ LATE-STAGE CAVEAT

Size quarter — the move is late. The reward is small. Skip if better setups exist.

╚══════════════════════════════════════════════╝
```

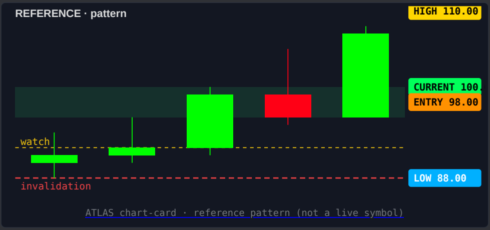
📚 Clean Bullish Breakout — Reference

Every Dark Horse candidate above is the same pattern in different markets. This is what it looks like on the chart, and what a trader actually does at each zone.



ATLAS chart-card · reference pattern (not a live symbol)

THE STORY

Price pushed through a level that had capped it for weeks (the old high). It came back to test the same level. Buyers stepped in to defend it. The ceiling has flipped into a floor.

HOW A TRADER ACTS (CONCRETE, DOLLARS-FIRST)

🟢 **BUY the pullback into the green ENTRY band — ONLY if the next 5-min candle opens inside the band AND closes above the band low.**

🔴 **Place the exit-point just below the dashed red INVALIDATION line. If price closes below it on the 1H, exit immediately.**

💲 **Dollar risk = (entry price − exit price) × position size × $/point. Size the trade so this number ≤ 1% of your account ($100 on $10k, COLMONEY$250 on $25k, COLMONEY$1,000 on $100k).**

RENDERED ATLAS CHART CARDS — NEXT EVOLUTION

Future scans will replace this prototype with a snapshot of the actual candidate, with the four zones drawn on live price action. Captured as TRC-20260513-006.
