+=====+
| 🟡🟡 😊 DARK HORSE — GLOBAL MOVER RADAR 🟡🟡 |
+=====+

3 standouts found this cycle.
1 fresh (new this scan) · 1 still active (1+ day) · 1 fading.

+=====+
| 🔵 > EXPANDED TERMINOLOGY HYPERLINKS 🔵 |
+=====+

See the terminology panel attached to this message.

+=====+
| 🟡 > Market Mood · 🟡🟡🟡🟡⬜ 4/5 — Elevated 🟡 |
+=====+

What [Market Mood] means right now:
broad market moving fast — larger pullbacks and sharper reversals are more likely.

Account-percentage guidance for today:
🟢 Position size — risk is capped as a percentage of account equity,
then reduced by lifecycle and current Market Mood.

- Exit-points — use the published invalidation / exit price from the card. Tight exits get hit before the confirmation condition completes.
- Lower-quality cards — skip them unless entry reference, confirmation, invalidation / exit, and Minimum ATLAS Buffer are all visible.
- Do NOT chase already-extended moves. Wait for price to return to the listed entry zone and confirm with the stated candle-close condition.

ATLAS · Dark Horse Radar

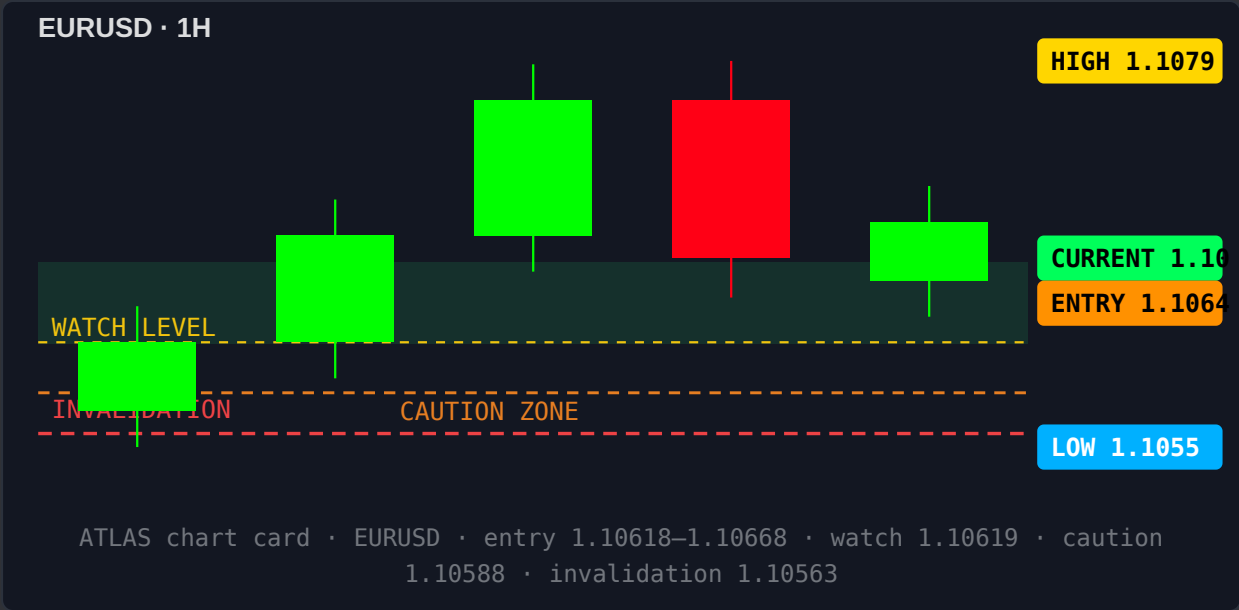

+=====+
| ▢▢ INITIAL STANDOUT • STANDOUT #1 of 3 ▢▢ |
+=====+

EURUSD • just appeared on this scan

▢ First active on this scan · new-cycle standout.

⊕ EURUSD · STRONG BULLISH

EURUSD closed above 1.10643 — the decision level for this card — and held a candle close above it. Buyers are defending that area on pullbacks. The move is new this scan.

MOVE TYPE

Breakout · early stage

DIRECTION

[Long ▲] — expecting price to keep moving up

CONVICTION

●●●●● 5/5 — Very High

Why Very High: price closed beyond the decision level + momentum increased + retest held + the decision area is defended by buyers (all 4 criteria met).

ATLAS EXECUTION STATE

WAIT FOR CONFIRMATION

Dark Horse scans movers; it is not standalone execution authority.

Why: model 5.7R is acceptable, but timing still needs candle-close confirmation.

ATLAS CONFIRMATION GATE

Execution gate:

- market context supports direction
- [Decision Level]: **1.10643**
- [Entry Zone]: **1.10618 – 1.10668**
- [Invalidation]: **1.10563**
- candle-close confirmation in required direction
- R:R: ATLAS preferred **1:3**; normal execution never below **2R**

DECISION LEVEL

[Decision Level]: **1.10643**

Why it matters: 1.10643 is the price the setup is built around.

Price must stay above this level for the bullish idea to remain valid. Each pullback toward that price has held, which shows buyers are defending the area.

EXPECTED DURATION

[Expected Duration]: Swing — days, not minutes

TODAY'S RANK

[Cycle Rank]: 1st of today's 3 standouts

WHERE TO ACT

● ENTRY zone **1.10618 – 1.10668**

Entry reference price: **1.10618 - 1.10668**.

Confirmation condition: 5m candle opens inside 1.10618 - 1.10668 and closes above 1.10618; next candle must hold above 1.10643.

Risk basis: Account-percentage risk only: size so loss at 1.10563 is no more than 0.5% account equity (fresh-card cap).

● WATCH level **1.10619**

Warning: price is moving against the idea before invalidation.

If 1H closes below **1.10619**, reduce exposure or stand aside; do not add risk.

WHERE TO ACT — CAUTION

● CAUTION zone 1.10619 – 1.10588

Price is against the setup. Technical distance is nearly spent.

Stand aside unless the next scan restores the entry reference.

WHERE TO ACT — INVALIDATION

● [Invalidation] **1.10563**

Invalidation / exit price: **1.10563**.

1H close below 1.10563 invalidates the long idea; exposure is flattened at the published invalidation / exit price.

Re-entry only after a new [Re-entry Structure] appears.

Price-point logic

Minimum ATLAS Buffer: **2.5 pips / 25 pipettes (0.00025)**.

Technical distance: **8.0 pips / 80 pipettes (0.00080)**.

Instrument-aware unit type: **FX pips / pipettes**.

Buffer reason: FX pairs use 0.0001 as one pip and 0.00001 as one pipette. Current volatility applies a 1.25x structural adjustment..

● Next review 2026-05-13 12:15 UTC

ATLAS re-reads every zone at the next scan.

\$ ACCOUNT RISK — FRESH-CARD ACCOUNT-RISK CAP

\$ Risk basis: account percentage, not fixed dollar examples.

\$ Maximum planned loss at invalidation / exit: **0.5% account equity** (fresh-card cap).

\$ Entry reference: ****1.10618 - 1.10668****.

\$ Invalidation / exit price: ****1.10563****.

\$ Technical distance: ****8.0 pips / 80 pipettes (0.00080)****.

\$ Minimum ATLAS Buffer: ****2.5 pips / 25 pipettes (0.00025)****.

\$ Unit type: ****FX pips / pipettes****.

\$ Fresh cards stay capped until a later scan confirms the structure is still holding.

WHAT THIS MEANS

The bullish idea remains valid only while price stays above decision level ****1.10643**** and above invalidation / exit at ****1.10563****. Entry is referenced only inside ****1.10618 – 1.10668**** after the stated confirmation condition.

WHAT TO DO NOW

- ① Entry reference price: ****1.10618 – 1.10668****.
- ② Confirmation condition: 5m candle opens inside 1.10618 - 1.10668 and closes above 1.10618; next candle must hold above 1.10643.
- ③ Risk basis: cap planned loss at ****0.5% account equity**** of account equity.
- ④ If ****1.10619**** closes below on 1H, reduce exposure or stand aside; do not add risk.
- ⑤ Invalidation / exit price: ****1.10563****; a 1H close below that level turns the bullish idea off.

WHAT CONFIRMS THE IDEA

A 5m close above ****1.10668**** after pulling back into the entry band — the **[Confirmed Candle Close]** test (price closes beyond the decision level AND the next candle holds in the required direction).

WHAT CANCELS THE IDEA

A 1H close below ****1.10563****. At that point price has invalidated the decision area and the bullish idea is cancelled.

SOURCE PROOF

Same evidence payload feeds text + PNG:

Decision ****1.10643**** · Entry ****1.10618 – 1.10668**** · Watch ****1.10619**** · Invalidation ****1.10563****.

Minimum ATLAS Buffer: ****2.5 pips / 25 pipettes (0.00025)****. Buffer reason: FX pairs use 0.0001 as one pip and 0.00001 as one pipette. Current volatility applies a 1.25x structural adjustment..

Instrument-aware unit type: ****FX pips / pipettes****.

Chart labels use these same values.

ATLAS · Dark Horse Radar

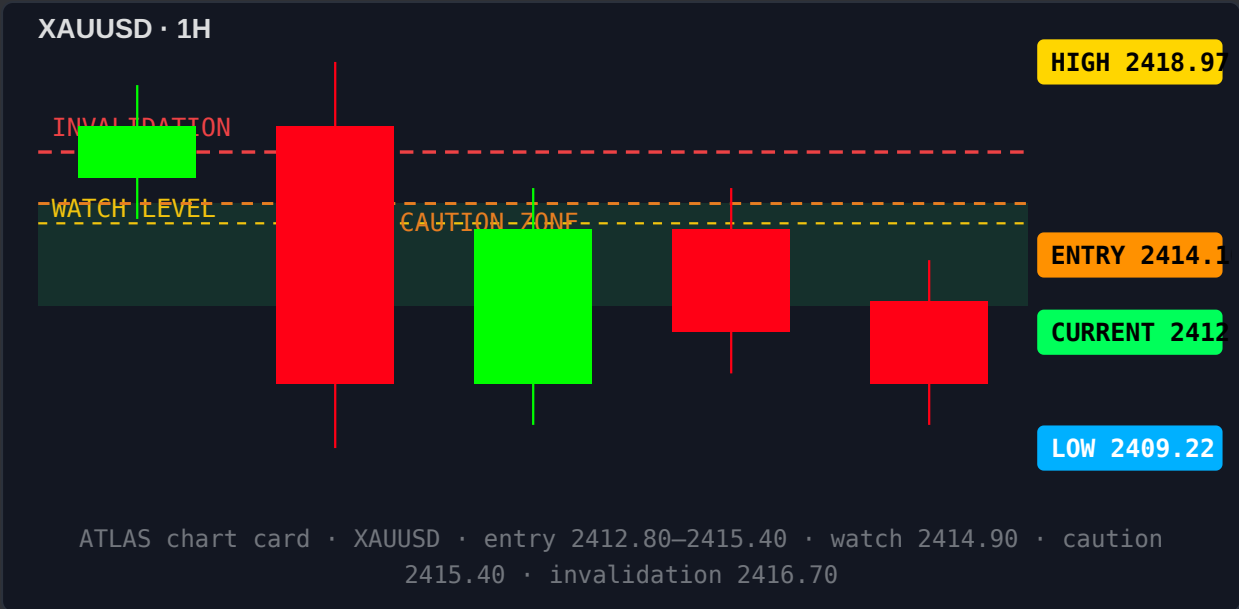

=====+
| ■ ■ STILL ACTIVE • STANDOUT #2 of 3 ■ ■ |
=====+

XAUUSD · trending across multiple cycles

■ First logged: 11/05/26 07:40 UTC · First active: 11/05/26 07:40 UTC · Still Dark Horse worthy after 2d 4h 20m.

⊕ XAUUSD · BEARISH PRESSURE

XAUUSD closed below 2414.10. Each bounce back toward that area has stalled, which shows sellers are defending the decision level. The move is new this scan.

MOVE TYPE

Continuation · mid stage

DIRECTION

[Short ▼] — expecting price to keep moving down

CONVICTION

●●●●● 4/5 — High

Why High: price closed beyond the decision level + sellers defended each retest across 2 cycles + momentum is holding (3 of 4 criteria met).

ATLAS EXECUTION STATE

EXECUTION CANDIDATE

Dark Horse scans movers; it is not standalone execution authority.
Why: STILL ACTIVE + model 3.0R meet ATLAS 1:3 before gates.

ATLAS CONFIRMATION GATE

Execution gate:

- market context supports direction
- **[Decision Level]:** **2414.10**
- **[Entry Zone]:** **2412.80 – 2415.40**
- **[Invalidation]:** **2416.70**
- candle-close confirmation in required direction
- R:R: ATLAS preferred **1:3**; normal execution never below **2R**

DECISION LEVEL

[Decision Level]: **2414.10**

Why it matters: 2414.10 has already been tested across multiple candles.
Price must stay below this level for the bearish idea to remain valid. Each rally back toward that price has stalled, which shows sellers are defending the area.

EXPECTED DURATION

[Expected Duration]: Swing — days, not minutes

TODAY'S RANK

[Cycle Rank]: 2nd of today's 3 standouts

WHERE TO ACT

● **ENTRY zone** **2412.80 – 2415.40**

Entry reference price: **2412.80 - 2415.40**.

Confirmation condition: 5m candle opens inside 2412.80 - 2415.40 and closes below 2415.40; next candle must hold below 2414.10.

Risk basis: Account-percentage risk only: size so loss at 2416.70 is no more than 0.7% account equity (standard account-risk cap after elevated-mood reduction).

● **WATCH level** **2414.90**

Warning: price is moving against the idea before invalidation.

If 1H closes above **2414.90**, reduce exposure or stand aside; do not add risk.

WHERE TO ACT — CAUTION

● **CAUTION zone** 2414.90 – 2415.40

Price is against the setup. Technical distance is nearly spent.

Stand aside unless the next scan restores the entry reference.

WHERE TO ACT — INVALIDATION

● **[Invalidation]** **2416.70**

Invalidation / exit price: **2416.70**.

1H close above 2416.70 invalidates the short idea; exposure is flattened at the published invalidation / exit price.

Re-entry only after a new **[Re-entry Structure]** appears.

Price-point logic

Minimum ATLAS Buffer: ****1.30 metal points / 13 ticks****.

Technical distance: ****2.60 metal points / 26 ticks****.

Instrument-aware unit type: ****metal points / ticks****.

Buffer reason: Gold uses metal points and 0.10 ticks; FX pip logic is not applied.

Current volatility applies a 1.25x structural adjustment..

Next review 2026-05-13 12:15 UTC

ATLAS re-reads every zone at the next scan.

 **ACCOUNT RISK — STANDARD ACCOUNT-RISK CAP (STILL ACTIVE)**

 **Risk basis: account percentage, not fixed dollar examples.**

 **Maximum planned loss at invalidation / exit: ****0.7% account equity**** (standard account-risk cap after elevated-mood reduction).**

 **Entry reference: ****2412.80 - 2415.40****.**

 **Invalidation / exit price: ****2416.70****.**

 **Technical distance: ****2.60 metal points / 26 ticks****.**

 **Minimum ATLAS Buffer: ****1.30 metal points / 13 ticks****.**

 **Unit type: ****metal points / ticks****.**

 **If Market Mood drops back to Quiet, the cap can return to the standard account-risk cap after a valid re-read.**

WHAT THIS MEANS

The bearish idea remains valid only while price stays below decision level ****2414.10**** and below invalidation / exit at ****2416.70****. Entry is referenced only inside ****2412.80 – 2415.40**** after the stated confirmation condition.

WHAT TO DO NOW

- ① Entry reference price: ****2412.80 – 2415.40****.
- ② Confirmation condition: 5m candle opens inside 2412.80 - 2415.40 and closes below 2415.40; next candle must hold below 2414.10.
- ③ Risk basis: cap planned loss at ****0.7% account equity**** of account equity.
- ④ If ****2414.90**** closes above on 1H, reduce exposure or stand aside; do not add risk.

⑤ Invalidation / exit price: **2416.70**; a 1H close above that level turns the bearish idea off.

WHAT CONFIRMS THE IDEA

A 5m close below **2412.80** after rallying into the entry band — the **Confirmed Candle Close** test (price closes beyond the decision level AND the next candle holds in the required direction).

WHAT CANCELS THE IDEA

A 1H close above **2416.70**. At that point price has invalidated the decision area and the bearish idea is cancelled.

SOURCE PROOF

Same evidence payload feeds text + PNG:

Decision **2414.10** · Entry **2412.80 – 2415.40** · Watch **2414.90** · Invalidation **2416.70**.

Minimum ATLAS Buffer: **1.30 metal points / 13 ticks**. Buffer reason: Gold uses metal points and 0.10 ticks; FX pip logic is not applied. Current volatility applies a 1.25x structural adjustment..

Instrument-aware unit type: **metal points / ticks**.

Chart labels use these same values.

ATLAS · Dark Horse · standout 2 of 3 · still active lifecycle

ATLAS · Dark Horse Radar

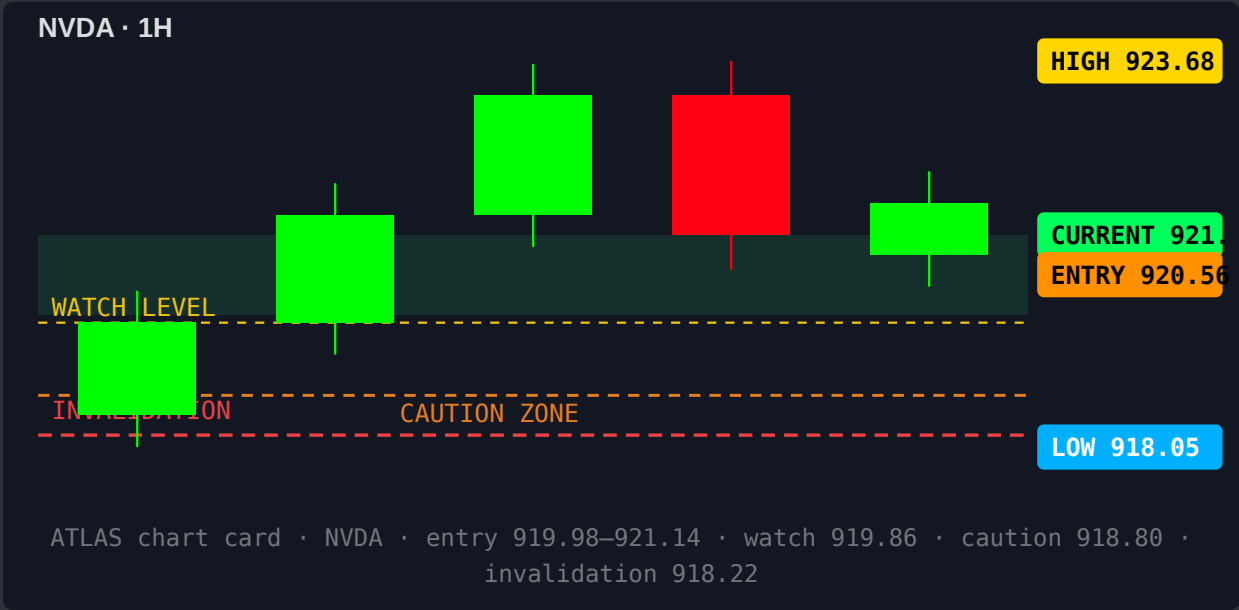

+=====+
| **FADING** • **STANDOUT #3 of 3** |
+=====+

NVDA • older mover, late-stage caution

Weakening: momentum/reward efficiency is fading · Cancels: the published invalidation level fails · Restores: a new entry reference and confirmation appear on a later scan.

🕒 NVDA • DEVELOPING WATCH

NVDA closed above 920.56 — the decision level for this card — and held a candle close above it. Buyers are defending that area on pullbacks. The move is new this scan.

MOVE TYPE

Continuation · late stage

DIRECTION

[Long ▲] — expecting price to keep moving up

CONVICTION

●●●●● 4/5 — High

Why High: decision level still valid + buyers still defending — BUT each new high is less efficient than the last, and the move is 25 cycles old (2 of 4 criteria met, 2 weakening).

ATLAS EXECUTION STATE

REDUCED SIZE ONLY / NOT PRIMARY

Dark Horse scans movers; it is not standalone execution authority.
Why: model 1.3R is below the 2R minimum and ATLAS 1:3 preferred standard.
Education / observation unless no higher-quality card exists: stronger conviction, closer entry, better R:R, less invalidation pressure.

ATLAS CONFIRMATION GATE

Execution gate:

- market context supports direction
- [Decision Level]: **920.56**
- [Entry Zone]: **919.98 – 921.14**
- [Invalidation]: **918.22**
- candle-close confirmation in required direction
- R:R: ATLAS preferred **1:3**; normal execution never below **2R**

DECISION LEVEL

[Decision Level]: **920.56**
Why it matters: 920.56 remains the active decision price while this late-stage setup is monitored.
_Price must stay above this level for the bullish idea to remain valid. Each pullback

EXPECTED DURATION

[Expected Duration]: Intraday — hours, not days

toward that price has held, which shows buyers are defending the area._

TODAY'S RANK

[Cycle Rank]: 3rd of today's 3 standouts

WHERE TO ACT

● **ENTRY zone **919.98 – 921.14****

Entry reference price: **919.98 - 921.14**.

Confirmation condition: 5m candle opens inside 919.98 - 921.14 and closes above 919.98; next candle must hold above 920.56.

Risk basis: Account-percentage risk only: size so loss at 918.22 is no more than 0.25% account equity (late-stage cap).

● **WATCH level **919.86****

Warning: price is moving against the idea before invalidation.

If 1H closes below **919.86**, reduce exposure or stand aside; do not add risk.

WHERE TO ACT — CAUTION

● **CAUTION zone 919.86 – 918.80**

Price is against the setup. Technical distance is nearly spent.

Stand aside unless the next scan restores the entry reference.

WHERE TO ACT — INVALIDATION

● **[Invalidation] **918.22****

Invalidation / exit price: **918.22**.

1H close below 918.22 invalidates the long idea; exposure is flattened at the published invalidation / exit price.

Re-entry only after a new [Re-entry Structure] appears.

Price-point logic

Minimum ATLAS Buffer: **\$0.58 / 58 cents**.

Technical distance: **\$2.34 / 234 cents**.

Instrument-aware unit type: **dollars / cents**.

Buffer reason: Equities use dollars and cents. Current volatility applies a 1.25x structural adjustment..

● **Next review 2026-05-13 12:15 UTC**

ATLAS re-reads every zone at the next scan.

\$ ACCOUNT RISK — LATE-STAGE ACCOUNT-RISK CAP

\$ Risk basis: account percentage, not fixed dollar examples.

\$ **Maximum planned loss at invalidation / exit: **0.25% account equity** (late-stage cap).**

\$ **Entry reference: **919.98 - 921.14**.**

\$ **Invalidation / exit price: **918.22**.**

\$ **Technical distance: **\$2.34 / 234 cents**.**

\$ **Minimum ATLAS Buffer: **\$0.58 / 58 cents**.**

\$ **Unit type: **dollars / cents**.**

□□ R:R is below 2R — use only if no higher-quality card is available: stronger conviction, closer entry, better R:R, less invalidation pressure.

WHAT THIS MEANS

The bullish idea remains valid only while price stays above decision level ****920.56**** and above invalidation / exit at ****918.22****. Entry is referenced only inside ****919.98 – 921.14**** after the stated confirmation condition.

WHAT TO DO NOW

- ① Late-stage card: cap planned loss at ****0.25% account equity**** of account equity.
- ② Entry reference price: ****919.98 – 921.14****.
- ③ Confirmation condition: 5m candle opens inside 919.98 - 921.14 and closes above 919.98; next candle must hold above 920.56.
- ④ Invalidation / exit price: ****918.22****; if 1H closes below it, the bullish idea is off.
- ⑤ Skip if another standout has stronger conviction, closer entry, better R:R, and less invalidation pressure.

WHAT CONFIRMS THE IDEA

A 5m close above ****921.14**** after pulling back into the entry band — the **[Confirmed Candle Close]** test (price closes beyond the decision level AND the next candle holds in the required direction).

WHAT CANCELS THE IDEA

A 1H close below ****918.22****. At that point price has invalidated the decision area and the bullish idea is cancelled.

SOURCE PROOF

Same evidence payload feeds text + PNG:

Decision ****920.56**** · Entry ****919.98 – 921.14**** · Watch ****919.86**** · Invalidation ****918.22****.

Minimum ATLAS Buffer: ****\$0.58 / 58 cents****. Buffer reason: Equities use dollars and

cents. Current volatility applies a 1.25x structural adjustment..
Instrument-aware unit type: **dollars / cents**.
Chart labels use these same values.

☐☐ **LATE-STAGE RISK NOTE**

Use quarter size because this is a **[Late-Stage Move]**. Skip if another card has stronger conviction, closer entry, better R:R, less invalidation pressure.

|    **BUILDING – WARMING UP BELOW STANDOUT GRADE**   |
+=====+

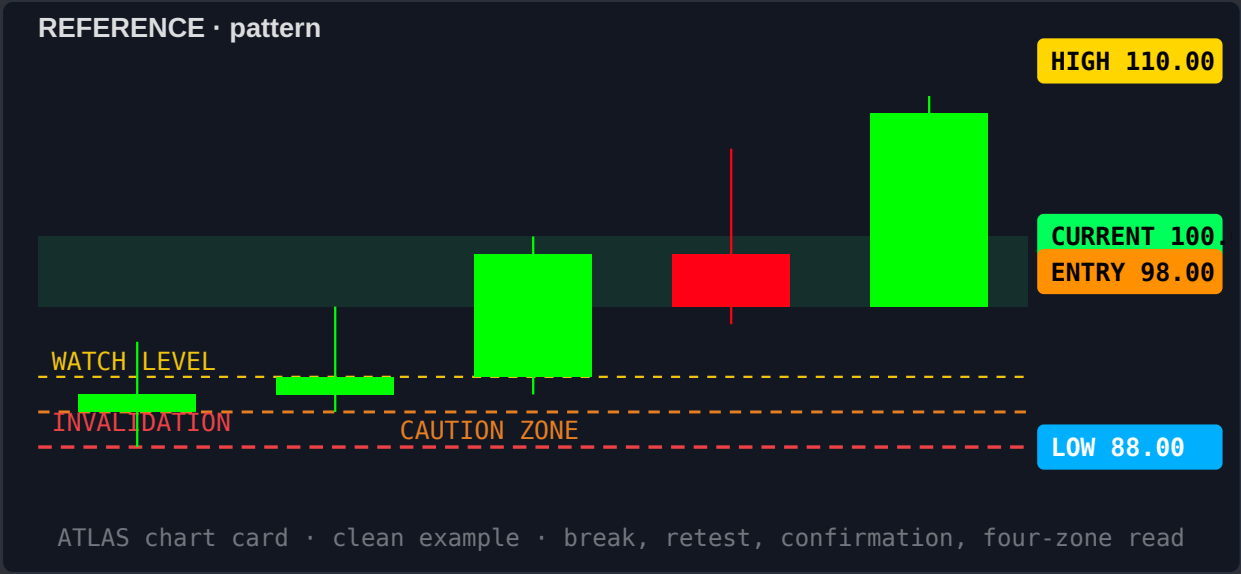

[Pullback] · [Support / Resistance] · [Reversal]

Two markets are close to the standout bar but not there yet.
Re-reading every 15 minutes — if either firms up by the next scan,
they graduate into a standout card with full execution detail.

+=====+
|    **CHART REFERENCE – HOW TO READ THE FOUR ZONES**   |
+=====+

 Clean Bullish Breakout — Reference

Every Dark Horse candidate above is the same pattern in different markets. This is what it looks like on the chart, and what a trader actually does at each zone.

WHAT YOU ARE LOOKING AT

Price closed above the decision level, returned to test that same area, and held above it. Buyers defended the level, so the long idea remains valid while invalidation holds.

HOW A TRADER ACTS (CONCRETE, ACCOUNT-RISK BASED)

- Entry reference lives inside the ****green ENTRY band**** — ONLY if the next 5-min candle opens inside the band AND closes above the band low.
- **Invalidation / exit lives at the ****dashed red INVALIDATION line****. If price closes below it on the 1H, the idea is off.**

\$ Account risk = entry-to-exit distance × position size × native point value. Size the trade so planned loss is capped at the card percentage of account equity.

RENDERED ATLAS CHART CARD

The attached chart image shows the same four zones used above: green entry band, yellow watch level, red invalidation line, and ATLAS price boxes.
