 DARK HORSE — GLOBAL MOVER RADAR

3 standouts found this cycle.
1 fresh (new this scan) · 1 still active · 1 fading.

 EXPANDED TERMINOLOGY HYPERLINKS

Breakout] Retest] Pullback] Support / Resistance] Invalidation]

► Market Mood · ELEVATED  (4 / 5)

What this means right now:
The broader market is moving fast. Big swings either side are more likely than usual. Trades that worked in calm conditions are more likely to be whipped out before reaching their target.

- _What this means for your trading this cycle:_
-  Use 60–70% of your normal position size, not 100%.
 -  Give risk-off levels more room — wider stops, not tighter.

- Skip marginal setups. Only act on the cleanest reads below.
- Do not chase already-extended moves. Wait for the next test.

★ **STANDOUTS — TODAY'S STRONGEST MOVERS**

- NEW **FRESH STANDOUT #1 of 3** · EURUSD just appeared on the radar

 EURUSD · STRONG BULLISH · NEW **FRESH**

Price pushed above 1.0950 — a level that had capped EURUSD for the last 3 weeks — and held the level cleanly on the 1H close. The move is new this scan.

MOVE TYPE

Breakout · early stage

DIRECTION

▲ Long (rising bias — price expected to keep moving up)

CONVICTION

●●●● / 5 · High

TRIGGER LEVEL

1.0950 — cleared cleanly on the 1H close

HORIZON

TODAY'S RANK

1st of today's 3 standouts

WHERE TO ACT

● **ENTRY zone 1.0920 – 1.0935**

Healthy area for the idea. If price pulls back into this band and pauses, that's where buyers are expected to step in.
Action: BUY small size — scale in only as the level holds.

● **WATCH level 1.0900**

Caution. A close below this on the 1H means the move is losing initial momentum. Don't add. Reduce existing size.
Action: hold what you have, do not chase further entries.

● **CAUTION zone 1.0900 – 1.0880**

Sellers (or buyers, if short) gaining the upper hand.
Action: scratch the trade for small loss. Stand aside until the next ATLAS scan reads the structure again.

● INVALIDATION close below 1.0875

Hard stop. The bullish idea is off entirely.
Action: exit any remaining size. Do not re-enter until a fresh structure forms on a later scan.

● Next review 12:15 UTC

ATLAS re-reads the structure at the next scan. Live levels above will update with what actually happened in price.

-  STILL ACTIVE STANDOUT #2 of 3 · XAUUSD (now in cycle 2)

XAUUSD · STRONG BEARISH · STILL ACTIVE

Gold broke below 2398 on the 1H close 2 cycles ago. Sellers are still in control of the structure and the level has held as a ceiling on the bounce.

MOVE TYPE

WHERE TO ACT

● ENTRY zone 2398 – 2402

Healthy area for the idea. If price pulls back into this band and pauses, that's where sellers are expected to step in.
Action: SELL small size — scale in only as the level holds.

● WATCH level 2406

Caution. A close above this on the 1H means the move is losing initial momentum. Don't add. Reduce existing size.
Action: hold what you have, do not chase further entries.

● CAUTION zone 2406 – 2412

Sellers (or buyers, if short) gaining the upper hand.
Action: scratch the trade for small loss. Stand aside until the next ATLAS scan reads the structure again.

● INVALIDATION close above 2415

Hard stop. The bearish idea is off entirely.
Action: exit any remaining size. Do not re-enter until a fresh structure forms on a later scan.

● Next review 12:15 UTC

ATLAS re-reads the structure at the next scan. Live levels above will update with what actually happened in price.

- NEW FADING STANDOUT #3 of 3 · NVDA — older mover, late-stage caution

🐎 NVDA · DEVELOPING WATCH · 🌅 FADING

NVIDIA's uptrend has been running for 4 cycles. The next push is getting smaller each scan — the move is mature. Wait for the next test, do not chase.

MOVE TYPE

Continuation · late stage

DIRECTION

▲ Long (rising bias — but reward is shrinking)

CONVICTION

●●● / 5 · Reduced

TRIGGER LEVEL

925.40 — still the structural level, but stale

HORIZON

Intraday — hours, not days

TODAY'S RANK

3rd of today's 3 standouts

WHERE TO ACT

● ENTRY zone 918.00 – 922.00

Healthy area for the idea. If price pulls back into this band and pauses, that's where buyers are expected to step in.

Action: BUY small size — scale in only as the level holds.

● **WATCH level 912.80**

Caution. A close below this on the 1H means the move is losing initial momentum. Don't add. Reduce existing size.
Action: hold what you have, do not chase further entries.

● **CAUTION zone 912.80 – 906.00**

Sellers (or buyers, if short) gaining the upper hand.
Action: scratch the trade for small loss. Stand aside until the next ATLAS scan reads the structure again.

● **INVALIDATION close below 902.50**

Hard stop. The bullish idea is off entirely.
Action: exit any remaining size. Do not re-enter until a fresh structure forms on a later scan.

● **Next review 12:15 UTC**

ATLAS re-reads the structure at the next scan. Live levels above will update with what actually happened in price.

⚠ **Late-stage caveat — the move is older than fresh ones. Half**

normal position size at most. Skip if conditions look messy.

-  **BUILDING & CHART REFERENCE**

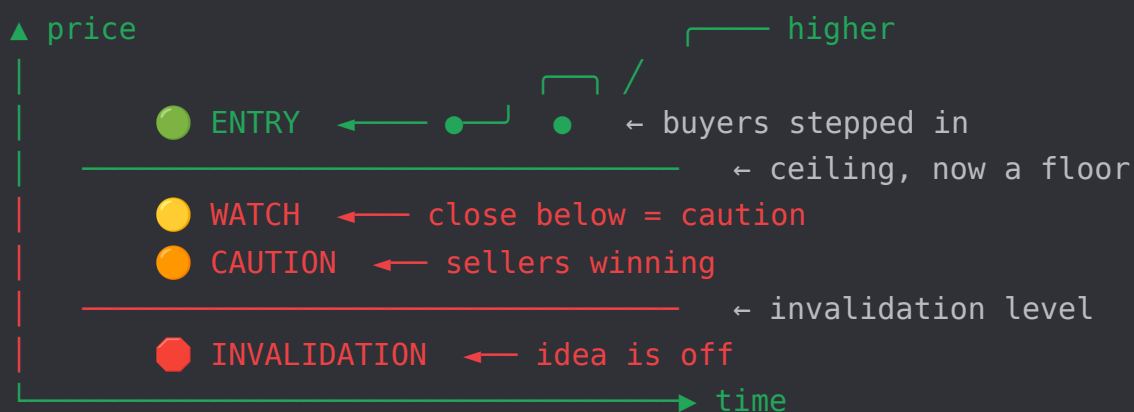

BUILDING — WARMING UP BELOW STANDOUT GRADE

Two markets are close to the standout bar but not there yet.
 GBPUSD needs a 1H close above 1.2600 to qualify.
 EURJPY needs momentum to expand on its next push (currently flat).
 If structure firms by the next scan, they'll graduate into a standout.

CHART REFERENCE – THE FOUR-ZONE READ

► How to read this

Every Dark Horse candidate above is broken into the same four zones. Walk top-down: ENTRY → WATCH → CAUTION → INVALIDATION. You always know which zone price is in, and what to do about it.

► How a trader uses this

Match live price to the zone. Only act when price is in the GREEN entry zone and conditions match the setup. Anything below RED means stand aside or exit. No guessing.

► Rendered ATLAS charts coming next

Future scans will replace this schematic with a rendered ATLAS chart of the actual candidate, with the same four zones drawn on the live price action.

► Risk reminder

Even a strong standout is a plan, not a guarantee. Every zone above is what ATLAS sees right now — live price moves and the zones move with it. Cross-check the current price against the zone before acting. ATLAS reviews again at 12:15 UTC.
